2. **CRIB Property Portal**

   Project Environment : HTML5, CSS3, Bootstrap 4, JavaScript.

   CRIB Portals:

   1. **CRIB Rent :** CRIB Rent is the portal where 4 main users exist with their different dashboards and flow is a Admin, Property Manager, Applicant, Owner and successfully verified applicant which then convert to tenants.
   2. **CRIB Maintain :** When the tenant is actually living with the property then to maintain the property or to fix issues inside the property to fix it property manager will arrange the workman to solve the issue.
   3. **CRIB Inspect :** To make an inspection of property after 3 months the property manager allocates the inspector to check whether everything is alright.

   Description : This is the platform where users can search and book the property on rent. This platform is made for the australia. In this project I flowed the design thinking process from the first step to gather information from clients, make the user personas and point of view, wireframes design and UI designs. Started developing this project in HTML5, Bootstrap 4, CSS and JavaScript.

   Role and Responsibilities :

   ➢ UX design, Design thinking & UI development.
   ➢ Decide the flow of every portal and design screen accordingly.
   ➢ Design wireframes, user journey persona, and mockups optimized for a wide range of devices and interfaces.
   ➢ Make the portal pages responsive.
   ➢ Make a responsive layout using a media query.
   ➢ Continuous collaborations with stakeholders & teammates.

3. **Valydate Video KYC**

   Project Environment : HTML5, CSS3, Bootstrap 4, JavaScript, Android, IOs Mobile application design using figma, Photoshop, Illustrator

   Description : The aim of this project is to make Video KYC. User document, details and other important verification is done through the mobile application and web portal. My contribution is to gather requirements and make the proper flow with user experience design and make UI screens for mobile applications and develop the web UI application using Bootstrap 4, HTML5, CSS3.

   Role and Responsibilities :

   ➢ Considering existing applications and evaluating their UX (user experience) effectiveness
   ➢ Considering the human-computer interaction (HCI) element of a design.
   ➢ Running user testing of applications, software, and websites.

➢ Design flow and low fidelity skatches.
➢ UI screens design and front end development.
➢ Collaboration with the development team.

4. **LOCALL**

Project Environment : HTML5, CSS3, Bootstrap 4, JavaScript.

Description : Local is a job portal for medical field experts to get jobs and provide jobs on the basis of hospital requirements.

Role and Responsibilities :

➢ Gather requirements from clients and make prototyping flow.
➢ Make the flow and design UI screens.
➢ Running user testing of applications, software, and websites.
➢ Front end development

5. **Wordpress Website design**

Work Environment - Wordpress, PHP and JavaScript
